

# Salmon: Effects of dissolved oxygen and predictive tools for feeding management

26<sup>th</sup> April 2024 | 10:00 – 11:00h (CEST)

Online

**We invite the general public and aquaculture professionals to participate in this webinar!**

We will present the results of the trials carried out in the context of NoviFEED, with salmon reared under different oxygen levels, and two predictive tools designed to support more efficient feeding management of salmon production.

## Agenda

- 10:00 Opening remarks
- 10:05 **Effects of dissolved oxygen on salmon performance**  
Ivar Rønnestad (UiB) and Nina Liland (IMR)
- 10:20 **FEEDNETICS™ and FiT feeding tables™ for salmon**  
Ana Nobre (SPAROS)
- 10:35 **Q&A**  
Audience and speakers
- 10:55 **Closing remarks**
